-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Figures 23(a), 23(b), 24, 25, 26 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 28-31, 33-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Prasad - US 5,268,315.

Prasad (Figs. 1-11 and text in col. 4, line 31 to col. 7, line 7) discloses the claimed invention by manufacturing on a GaAs substrate a heterojunction bipolar transistor, a Schottky diode, and a resistance element in first, second, and third regions. The collector layer is under the base layer and the the base layer is under the emitter layer, and the first semiconductor layer of the Schottky diode is the same layer as the collector layer. Fig. 5 shows a separation groove formed between the first region and the second region. A "resistance film" of the resistance element may be interpreted to be layer 86 which is the same as layer 87 of the Schottky diode electrode.

Art Unit: 2813

Claims 32, 37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Keller - US 5,457,062 describes forming a bipolar transistor with a resistor.
